

The resources companion for the COVID-19 (Clinical) ECHO network

This document is intended for professionals working in hospice and end of life care. It provides a collation of resources mentioned by colleagues participating in the regular COVID-19 (Clinical) ECHO sessions. These sessions began on a weekly schedule in March, and moved to a fortnightly basis from 13 May, (with a monthly programme introduced from July). This list also includes information about a selection of other materials which have been brought to our attention outside of, but in relation to the ECHO sessions – these entries are shaded and the date when they were added to the list is noted in the ‘ECHO date’ column. Links to documents provided by ECHO participants are included as we receive them – for those participating in the ECHO sessions, see also the COVID-19 ECHO page on our website for further resources. Whilst this list focuses on resources from the UK, it also includes a few materials from overseas so please note that medications recommended will vary from UK practice, and the pathways/operational guidance reflect local requirements.

This list represents material and sources of help and support that have been brought to our attention; there may be further relevant resources which are not noted here. Inclusion in the list below does not imply approval or endorsement. It is the responsibility of the reader to check for latest updates and determine the accuracy, validity and application of these resources and obtain any appropriate professional advice.

Presentations from the ECHOs

Presentations and resources shared by speakers are available to participants of these ECHOs on the COVID-19 Project ECHO Network and Resources page of Hospice UK’s website.
